

OrganoStart Pro Package

3-lane 64

MIMETAS

Get started with 3D tissue modeling and TEER

Start today with developing 3D tissue models and assessing their endothelial and epithelial barrier function at high throughput. With our OrganoStart Pro Package you'll be able to kickstart your first experiments successfully using the OrganoPlate® in combination with the OrganoTEER®.

The package includes:

20x OrganoPlate® 3-lane 64

OrganoTEER®
Standard package
Including:

- Laptop with Software
- 1x OrganoReady® Colon Caco-2 for installation**

5x OrganoReady®

- 4x OrganoReady® cell model of choice**
- 1x OrganoReady® Collagen*

OrganoFlow® L

E-learning Module
Including key reagents**

4hrs
Consultancy
by Field Application Specialist

* Shipping costs to Europe, Japan, United States and Canada included

** Shipping available to Europe, Japan, United States and Canada

OrganoTEER® Service

Installation and Training
by Field Application
Specialist (FAS)

2-year warranty

2 years of Preventive
Maintenance after
9 and 21 months

for the latest protocols.

The OrganoPlate® 3-lane platform with the OrganoTEER will become a standardized assay in our early investigative toxicology drug screening workflow. With the OrganoPlate® we see a reproducible early screen for intestinal toxicity, and the first example internally of an advanced cell model being implemented into routine testing. To date, the OrganoPlate Caco-2 model is for us, at Merck, the most suitable platform offering at the same time scalability, speed, robustness, ease of handling, with low compound needs.

Philip Hewitt, Early Investigative Toxicology, Pre-clinical Safety, Merck
